**DEPARTMENT INFORMATION:**

The Colorado Department of Military and Veterans Affairs (DMVA) has four major operational divisions: Army National Guard, Air National Guard, Civil Air Patrol, and Veterans Affairs. These divisions utilize state and federal resources to provide our communities, state, and nation with a ready military force for national defense and State emergency response as well as providing assistance to our Colorado Veterans.

DMVA offers comprehensive benefit programs to its classified work force that includes paid holidays, annual leave, sick leave, medical, dental, life, disability, flexible spending accounts, and public retirement options. DMVA also strives to assist employees in achieving a healthy work/life balance by offering access to on-site exercise facilities and fitness programs.

**DESCRIPTION OF JOB:**

This position is a part of our Air National Guard division and is located on Buckley Air Force Base. Specific duties include, but are not limited to:

- ensuring standards and procedures are adhered to in accordance with Federal Aviation Administration, U.S. Air Force, Air National Guard directives, and local directives and regulations;
- assuming responsibility for air traffic control services during scheduled shift;
- performing separation, control, and sequencing of aircraft within the Class DELTA and ECHO airspace;
- continuously assessing the operating condition and status of tower equipment, logging

and tracking all maintenance, utilizing back-up and alternate equipment during primary equipment outages, and approve equipment operability prior to bringing equipment back in service;

- utilizing the tower radar display to aid in visually locating aircraft or determining their special relationship to known geographical points, providing traffic advisories, assisting with landing sequence, and providing surveillance of Class DELTA airspace;
- planning and directing tasks performed by subordinates during shift;
- providing emergency assistance to aircraft in distress;
- activating the primary crash phone for local emergencies and relaying aircraft emergency information to emergency response teams; and
- monitoring, relaying, and recording on Automatic Terminal Information Service (ATIS) weather observations, forecasts and advisories in accordance with the National Weather Service and facility directives.
